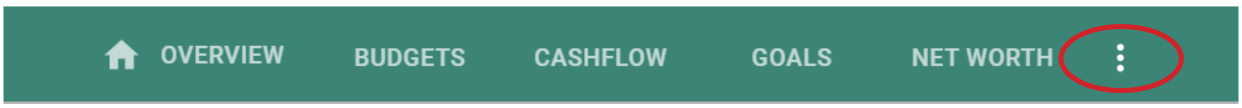
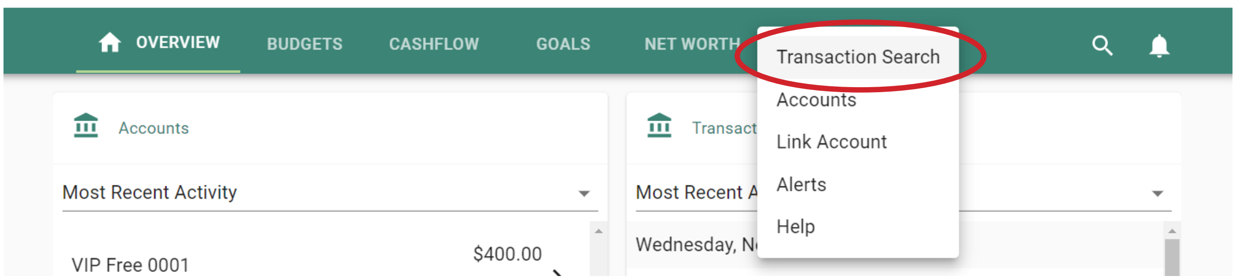
How do I save transaction data from Funds Tracker?

As part of your new digital banking experience, you will have access to a new suite of financial wellness tools. Unfortunately, this means you will no longer have access to Funds Tracker. If you are currently a Funds Tracker user and would like to save your transaction data for your records, please make sure you complete the following steps:

1. Access the Funds Tracker tab and select the 3 dots in the banner navigation.



2. From the dropdown menu, select **Transaction Search**.



3. Once **Transaction Search** is selected, the requested transactions or information will appear. To download, click on **Export**. Once selected, an excel spreadsheet will be produced with the saved categories.
